### **Supplemental Conditions for Performing Work in County Right-of-Way**

**Date: 08/13/2007**

**Applicant: Committee To Restore Duncan Creek – Dave Kimble**

**Project Location: Duncan Creek – Colchester Dr. and Hemlock St.**

**Right-of-Way Permit # 07 48240**

1. A copy of the Right-of-Way Permit, HPA Permit, and approved Construction Drawings shall be on site at all times while work is occurring within County Right-of-Way.
2. All construction within the County Right-of-Way shall be accomplished in accordance with the Construction Drawings, HPA Permit, and Right-of-Way permit. Where conflicts exist, the conditions spelled out in the HPA Permit and Right-of-Way permit **shall** prevail.
3. The applicant is responsible for all work, site conditions, and restoration associated with this permit, during construction.
4. Applicant shall notify all adjacent property owners, in writing and by certified mail explaining the scope of the work that shall take place on this project. The letter shall include, but is not limited to, estimated start and completion date and address and phone number of point of contact at Kitsap County Public Works for any concerns property owners may have while project is taking place.

**Point of Contact: Ron Brown – Lead Right-of-Way Inspector**

**614 Division St. (MS-26)  
Port Orchard, WA. 98366-4699  
(360) 337-4658**

A copy of the letter and certified mail cards shall be submitted to Kitsap County Public Works before commencing any work on this project.

(Attn: Ron Brown – Lead Right-of-Way Inspector)

5. The Applicant shall obtain the services of a Professional Land Surveyor, licensed in the State of Washington, to Survey and stake the limits of right-of-way and/or to reference and re-establish any existing property corner staking that may be disturbed on this project. A copy of the stamped plan shall be submitted to Kitsap County Public Works, for approval before commencing any work on this project. (Attn: Ron Brown – Lead Right-of-Way Inspector)
6. **Approval of this permit is only authorizing work to be performed in Kitsap County Right-of-Way, and not on private property or accessing right-of-way across private property**

## **Kitsap County Department of Public Works**

614 Division Street (MS-26), Port Orchard, WA 98366-4699

*R. W. Casteel, P.E., Director*

7. In emergency situations, Kitsap County shall have the right to provide all necessary temporary construction / or Erosion and Sedimentation repairs, to provide a safe environment for the general public. Kitsap County shall also have the right to complete the project if applicant has unsuccessfully completed project under the 6-month active status of this right-of-way permit. **For both if these actions the applicant shall be fully responsible all costs for such repairs.**
8. Erosion and Sedimentation Control shall be implemented on this project, when determined necessary by the County Inspector. All disturbed areas shall be stabilized as work progresses.
9. **Any** storm water run off impacts associated with this project shall be the applicant's responsibility.
10. **The grantee shall commence work within 30 days after the granting of this permit. If, at end of six (6) months after date of granting same the grantee shall have not completed the installation, then the rights herein conferred shall cease and terminate.**

**Duncan Creek Stream Channel & Flood Plain Restoration Project  
(The Committee to Restore Duncan Creek, Inc.)**

**Project Location.**

Project located within Kitsap County Right of Way located West of Colchester Drive and East Hemlock Street.  
(Encl. 1-2)

**Project Description.**

Minor temporary construction of 12" planking to provide access at base of Colchester (South to North line) for ingress and egress. Excavation of native soils to re-grade approximately 200' feet of existing stream channel. Stream channel floodplain to be contoured into 3:1 slope (Encl. 3) using hand-tools and possibly small Bobcat type loader if donations found.

~~Excavated soils deposited away from floodplain and evenly distributed within County Right of Ways.~~ Some soils used to form future planting mounds and features for Phase III – site-planting plan (Encl. 5) Phase II to temporarily divert Stream Channel flows to permit excavation of sediments and soils in the stream channel. Replacement of these sediments with approved spawning gravel in locations approved by Washington State Department of Fish and Wildlife during Phase II of project.

Once spawning gravel features completed with approved landscaping and hydraulic work-practices, return stream channel flows to existing stream channel course. Phase III to consist of streamside riparian restoration in newly created flood plan and immediate locations as indicated on planting plan on both sides of existing stream channel. Phase III of project dependent upon donations of plants and other local, state, federal winning of grants to accomplish streamside-planting plan.

**Project Timing.**

Project start date anticipated to be 4th week of July or 1<sup>st</sup> week of August 2007. Project JARPA time period is two-years.

~~\_\_\_\_\_ in  
State Department of Fish and Wildlife \_\_\_\_\_ by \_\_\_\_\_ if needed~~

**Project Tools & Materials.**

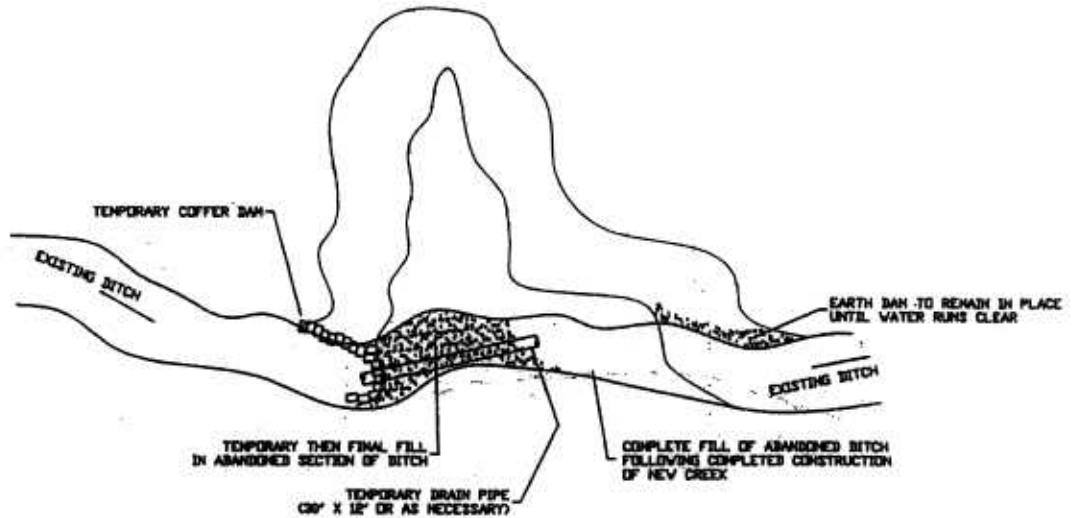

Tools used to include shovels, rakes, wheelbarrows and 5-gallon buckets & 2" x 6" planking. Streambed Spawning Gravel, Native Plants, Trees, Bushes and Shrubs. Potential donation of Bobcat type machine for some excavation work possible.
